

GENERAL NOTES

- 1. If any site conditions are encountered that are contrary to the drawings or any details are not understood, please contact this office for clarification.
- 2. Dimensions shall be used in preference to scaling from drawings.
- 3. All works are to be set out and confirmed prior to construction.
- 4. All materials and workmanship shall be in accordance with the relevant and current SA codes and with the NRLG standards and specifications.
- 5. All services are to be located in the field in conjunction with a responsible officer of each relevant authority prior to the commencement of construction.
- 6. All bare soil areas are to be protected from erosion by temporary measures and revegetated at the cessation of construction.
- 7. All excavations, trenching, shoring etc. to be undertaken in accordance with "Excavation Work - Code of practice July 2012" by Safe Work Australia and other relevant codes and standards.
- 8. It is the contractors responsibility to satisfy themselves of the location of all existing services on site, whether indicated on these drawings or not.
- 9. All signs and linemarking to be in accordance with AS1742

ROADWORKS

- 1. Specified pavement materials to be supplied in accordance with the requirements of the NRLG specifications
- 2. Pavement material compaction to be in accordance with NRLG specification and to the following minimum standards:
 - base and sub-base course gravels, 100% standard compaction.
 - subgrade, 95% standard compaction;
 - select fill material, 100% standard compaction
- 3. The contractor shall coordinate with the superintendent the following hold point inspections:
 - Subgrade proof roll
 - Finished sub-base proof roll
 - Finished base proof roll.Provide 24 hours notice for all inspections.
- 4. All material shall be compacted in layers not exceeding 150mm compacted thickness. Each layer shall be compacted to the relative compaction specified before the next layer is commenced.
- 5. Seal design elements not specified on these drawings shall be by the contractor
- 6. The contractor shall be responsible for the provision of Work-As-Executed drawings of the finished works.

STORMWATER NOTES

- 1. All services are to be located in the field in conjunction with a responsible officer of each relevant authority prior to the commencement of construction.
- 2. RCP pipes shall be Class 4 RRJ UNO.
- 3. RCP pipes to be installed in accordance with NRLG specifications and AS3725 with the following bedding types:
 - HS2 Trafficable areas
 - H2 Non trafficable areas
- 4. PVC pipes to be installed in accordance with NRLG specifications and AS2032
- 5. Drainage is to comply with relevant standards including AS3500.3.2003 Plumbing & Drainage, Part 3: Stormwater Drainage, NRLG specifications and Council DCP requirements.
- 6. All bare soil areas are to be protected from erosion by temporary measures and re-vegetated at the cessation of construction.
- 7. These plans are diagrammatic and show the general location of pipework. Works shall be set out on site by the site foreman. If in doubt, ask the superintendent who shall consult the designer.
